

# GREGORY TORDOFF

I am an Information Systems major looking to get into a career working in IT for a ski resort after I graduate. I am looking forward to merging my passions of skiing and computers into a wonderful career!

Some non-technical things about me are that I love to ski and be outdoors when I'm not at school. During the warmer seasons, I love to be out and paddleboarding!

My aspirations are to live my life to its fullest, making friends wherever I go and have no regrets. I strive to always keep learning, be it from academics or the small things that are overlooked

My technical background includes working with event management software, the office suite, the google suite, and a bit of AI exploration. I mainly work with windows but plan to explore some linux to see how much I can learn there.
